

# Fast Recovery from Acute MSK Lesions through Class 4 High Power Laser Therapy (Photo-Biomodulation)

Photo-Biomodulation (PBM) with Class IV Laser represents an effective Treatment for Acute & Chronic MSK Lesions, Wound Care and Peripheral Neuropathy with long lasting results. Dr. Phil Harrington from the USA will present the PBM mechanisms, Treatment protocols, techniques and scientific data.

**15. May 2026, 12.45 – 13.45 h**

Place: Gartensaal 1C, Kongresshaus Zürich

## Agenda

Introduction to Class IV Laser Therapy (Photobiomodulation)

Indications and applications, treatment protocols in pain management

Current study overview

Case presentations

Laser treatment delivery demo

## Registration and further informations
